

Find data from LinkedIn by URL/name

If you have imported a list of companies from a source different than LinkedIn, you can locate them in LinkedIn to scrape their information fields and search for contacts to this companies.

If you have the LinkedIn URL - Search LinkedIn data by URL 🚨 If you have the company's LinkedIn URL, you can scrape them directly !! **Attention:** this is the **LINKEDIN URL**, NOT the website.

If you have the company's LinkedIn URL, you can scrape them directly

Follow these steps:

1 Go to the list of **Companies > select the companies**

.

Follow these steps:

1 Go to the list of **Companies > select de companies**
