

# Switching contacts from one list to another

## 📌 Example:

We have **List1** (origin list) and want to move certain leads to **List2** (the destination list).

### 1 Select the Leads from List1 🔎

Go to **Lists > List1**

Identify the leads you want to move:

- **Manual selection:** Click on the leads individually.
- **Using filters:** Use the available filters

### ## 2 Move the Leads from List1 to List2

- With leads selected, click on **Change list**
- Choose one of these options:
  - **Create a new list:** Enter the name "List2" and confirm.
  - **Add to an existing list:** Select the list where you want to add the leads from the dropdown menu.

### 💡 From CHANGE LIST 🕵️ Here you can see the lists where the selected leads are currently included, marked with .

From this point ↗

### 3 OPTIONS ★

- **To remove Leads from a list:**

Uncheck the  box next to the list where **you no longer want the leads to appear**. (They will disappear from List1 and remain in List2.)

- **To keep Leads in both lists:**

Leave both  boxes checked for both lists. (The leads will remain in both List1 and List2.)
