Import companies from Theirstack by tech stack

Want to create a list of companies based on their tech stack?

Follow these steps:

1️⃣ Go to Home > Create > List > Companies > Find Companies by Technology Stack from TheirStack

⚙️ **Configure the filters as needed:** The tool offers several filters to personalize your search. Make sure to fill in at least the mandatory field:

- 🛠️ **Technologies Used (Required):**

Select the technologies you want to include or exclude. Examples: **JavaScript, Python, Microsoft Excel.**

- Use the options **Include** ✅ or **Exclude** ❌.

- Toggle between **Or** 🔁 and **And** ➕ to refine the search criteria.

After configuring the filters, press "**Next**"to proceed

2️⃣ Generate the list

1️⃣ Import the companies you want

2️⃣ Create the list

- **Create a New List:** Choose this option if you want to save the imported companies as a new

- **Add to an Existing List:** If you already have a list where these companies fit, you can add them there

🚨 **Reminder**: When importing companies from **Theirstack by Tech**, remember to **Find Data from LinkedIn by URL / Name**. 👉 <u>Check the guide here</u>.
